LOOP

RENT • BUY • SELL

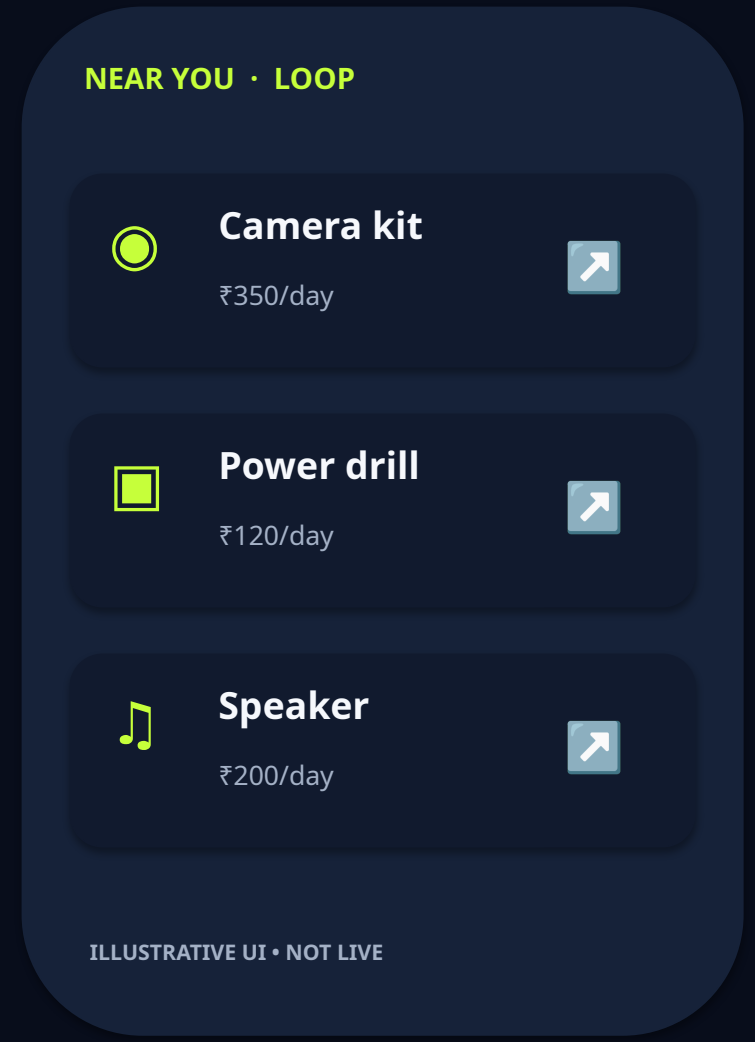

Get More. Own Less.

ENGLISH

A location-based marketplace for accessing products nearby instead of buying everything.

HINGLISH MEIN

Apne aas-paas ki cheezein rent par lo, khareedo ya apni unused cheezein sell karke earning karo.

PRESENTER CUE · Introduce LOOP as a practical way to access useful things without needing to own everything.

The problem

Useful things sit idle while people keep buying.

BUY FOR ONE-TIME USE

High upfront cost for a short-lived need

IDLE POSSESSIONS

Useful items sit unused while others search

ENGLISH

People often buy expensive products for temporary use. Useful possessions remain unused, and trustworthy local rentals can be inconvenient to find.

HINGLISH MEIN

Kisi ko projector sirf ek din chahiye, kisi ko drill sirf ek baar. Ek taraf log khareedte hain, doosri taraf wahi cheezein kisi ke ghar unused padi hoti hain.

PRESENTER CUE · Use the projector and drill examples to make the problem easy to picture.

One loop. Five ways to access value.

Rent • Buy • Sell • Swap • Give Away

RENT	BUY	SELL	SWAP	GIVE AWAY
Use temporarily	Own it	Earn from idle items	Exchange value	Pass it on

ENGLISH

One app brings together temporary access, ownership, resale, exchange and giving useful items a second life.

HINGLISH MEIN

Ek hi app mein zaroorat ki cheez dhoondo, rent karo, buy karo, apni cheez sell ya swap karo, ya free mein de do.

PRESENTER CUE · Explain that each mode serves a different need, all in one experience.

How LOOP works

From discovery to handover in five steps.

01 OPEN → 02 CHOOSE MODE → 03 SET RADIUS → 04 COMPARE → 05 COMPLETE

ENGLISH

1. Open app → 2. Choose Rent/Buy/Sell → 3. Set radius → 4. Compare listings → 5. Chat, book or complete transaction.

HINGLISH MEIN

App kholo, mode select karo, distance set karo, options compare karo aur safe transaction complete karo.

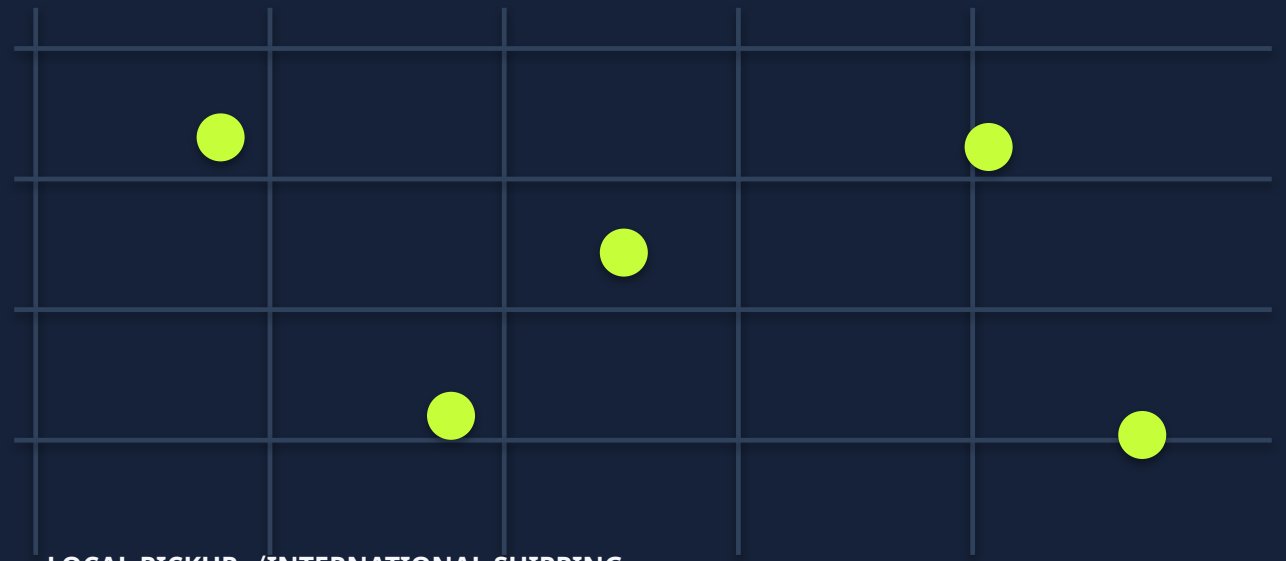

PRESENTER CUE · Walk the audience through the flow; say safety steps reduce risk but cannot remove it entirely.

Nearby first. Global when useful.

Choose your radius: 1 km • 5 km • 10 km • 25 km

SEARCH RADIUS

1 km | 5 km | 10 km | 25 km

ENGLISH

Map view, distance sorting and manual location selection help users find local options. Worldwide discovery is separate from local pickup; shipping and delivery are shown separately.

HINGLISH MEIN

User decide karega ki sirf 5 km ya 10 km tak dekhna hai. Global search mein door ke products bhi milenge, lekin shipping aur delivery alag show hogi.

PRESENTER CUE · Clarify that a global listing does not mean an item can be picked up locally.

A marketplace for everyday needs

Many categories. Clear safety boundaries.

- Electronics
- Cameras
- Tools
- Books
- Furniture
- Party gear
- Sports
- Music
- Travel
- Home appliances

ENGLISH

Electronics • Cameras • Speakers • Tools • Books • Furniture • Party equipment • Sports gear • Musical instruments • Travel equipment • Eligible household appliances. Restricted and dangerous products are prohibited.

HINGLISH MEIN

Camera, speaker, drill, books, furniture aur party equipment jaise allowed items list ho sakte hain; unsafe ya illegal items prohibited honge.

PRESENTER CUE · Give examples of useful items and explain why category rules matter.

Features designed around real use

Search, trust and rental lifecycle in one place.

- ✓ AI natural-language search
- ✓ Wanted-item alerts
- ✓ Clear price breakdown
- ✓ Return reminders
- ✓ Wishlist / rent-to-buy
- ✓ Availability calendar
- ✓ Verified profiles
- ✓ Chat, reviews & history
- ✓ Condition photos
- ✓ Optional delivery

ENGLISH

AI natural-language search • Live availability calendar • Wanted-item alerts • Verified profiles • Transparent price breakdown • Chat and reviews • Booking history • Return reminders • Condition photos • Wishlist • Rent-to-buy • Optional delivery.

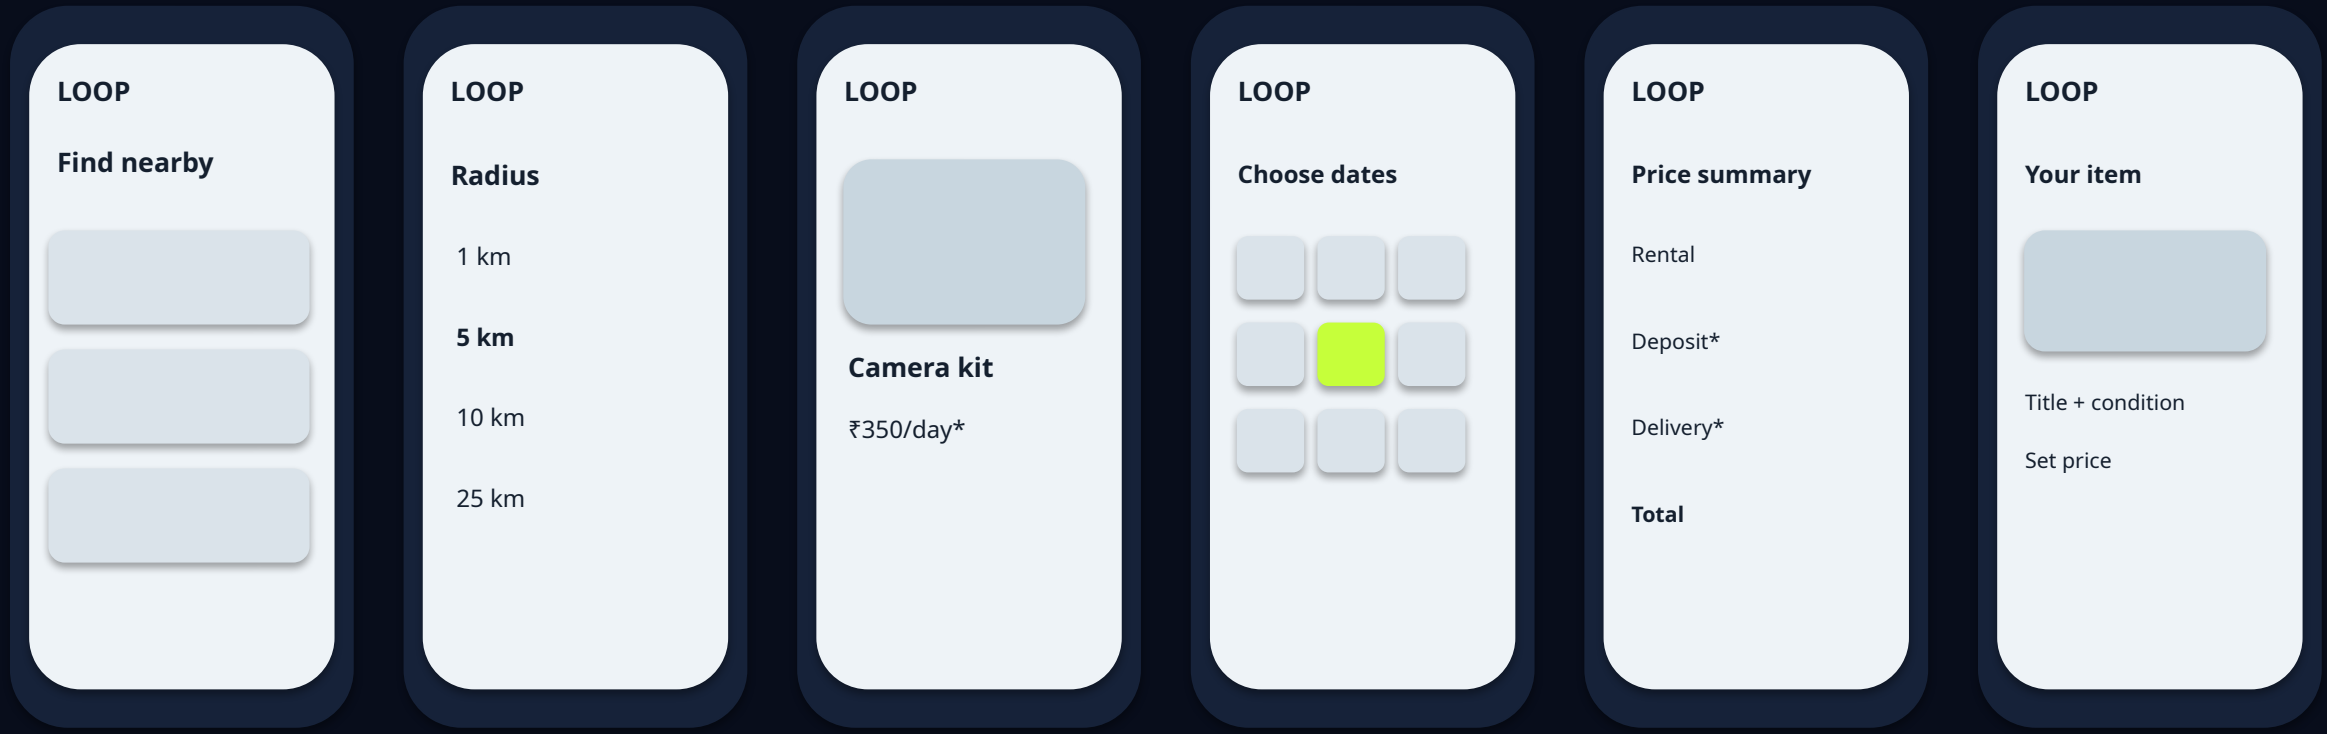

HINGLISH MEIN

User likhe: “Mujhe kal ke liye ₹500 ke andar speaker chahiye, 5 km ke andar.” App matching listings dhoondhne mein help karegi.

PRESENTER CUE · Describe AI as matching assistance, not a guarantee that a perfect listing always exists.

A first look at the LOOP experience

Illustrative prototype screens — not live inventory.

HOME RADIUS DETAIL CALENDAR CHECKOUT LIST ITEM

ENGLISH

Sample screens and prices are illustrative, not live inventory.

HINGLISH MEIN

Yeh demo screens hain; listings aur prices sirf example hain.

PRESENTER CUE · Point out the six screens and explicitly note that the sample listings are mock data.

Trust is a product feature

Make transactions clearer, not risk-free.

VERIFY

Account + suitable ownership checks

DOCUMENT

Condition photos + handover record

CLARIFY

Deposits, fees and return terms

RESPOND

Reports, moderation and disputes

PROTECT

Share only necessary location data

ENGLISH

Account verification • Appropriate ownership checks • Documented handover/return • Before-and-after condition photos • Transparent deposits • Reporting and moderation • Dispute resolution • Privacy-conscious location sharing.

HINGLISH MEIN

Item dene aur return karne se pehle photos aur condition record hogi. Verification aur dispute system risk kam karenge, lekin fraud ko completely eliminate nahi kar sakte.

PRESENTER CUE · Stress practical safeguards and avoid promising zero fraud.

Build lean. Learn early.

Three preliminary planning scenarios

PROTOTYPE

₹0–₹5,000

Independent build • limited scope

LEAN PILOT

₹10,000–₹50,000

Small implementation • variable services

PRODUCTION

Separate estimate

Scope, security, payments, moderation, traffic

ENGLISH

PROTOTYPE: ₹0–₹5,000 — independent build with free tools and existing devices; excludes personal labour and may be limited. LEAN PILOT: approx. ₹10,000–₹50,000 — limited scope; depends on hosting, services and outsourced work. PRODUCTION MARKETPLACE: separate developer estimate based on scope, security, payments, moderation and traffic.

HINGLISH MEIN

Yeh starting estimates hain, vendor quotations ya guaranteed costs nahi. Hosting, maintenance, payment fees, verification aur customer support ka recurring kharcha bhi hoga.

Recurring costs may include hosting • maintenance • payment fees • verification • support • security • compliance

PRESENTER CUE · Explain what each estimate includes and excludes; do not call the full app free.

A business model to test

Start simple; charge when value is proven.

TRANSACTION FEE	After successful booking
PROMOTION	Optional seller visibility
BUSINESS PLAN	Professional rental sellers
INVENTORY TOOLS	Manage multiple items

ENGLISH

Possible revenue: transaction service fees, optional seller promotion, subscriptions for professional rental businesses and business inventory tools. Start with free basic listings; test a transparent fee after successful transactions.

HINGLISH MEIN

Shuru mein users ko attract karo; baad mein completed bookings par reasonable service fee aur business subscriptions test karo.

PRESENTER CUE · Emphasize these are hypotheses to validate, not proven revenue.

Different by combination — not by unsupported claims

A focused product proposition

PROPOSED COMBINATION

- Radius-based discovery
- Rent / Buy / Sell in one UI
- Wanted-item matching
- Rental lifecycle records
- Transparent price breakdown

VALIDATE BEFORE CLAIMING

Research alternatives
Interview target users
Test willingness to transact
Measure repeat use

ENGLISH

Proposed combination: distance-based discovery, Rent/Buy/Sell in one interface, AI wanted-item matching, documented rental lifecycle and transparent pricing. Competitors and customer demand must be researched before claiming a defensible advantage.

HINGLISH MEIN

Hum yeh claim nahi karte ki LOOP pehla ya akela app hai. Pehle competitors aur user demand research karni hogi.

PRESENTER CUE · Say differentiation is a hypothesis that must be tested against alternatives.

Start with one community

Earn the right to expand.

- Students
- Families
- Event teams
- Photographers
- Hobbyists
- Local shops
- Small businesses

ENGLISH

Target users: students, families, event organizers, photographers, hobbyists, local shop owners and small businesses. Start in one neighbourhood, build reliable supply, prove transactions, then expand to a city, country and supported international markets.

HINGLISH MEIN

Pehle ek chhote area mein enough listings lao, successful transactions prove karo, phir next area mein expand karo.

PRESENTER CUE · Explain the local marketplace challenge: users need useful listings nearby.

Go-to-market: supply, trust, feedback

A practical first launch

01	**Seed supply**	30–50 legitimate listings target
02	**Build partnerships**	Local rental shops + communities
03	**Invite carefully**	Community groups + referral tests
04	**Learn from use**	Feedback + completed transactions

ENGLISH

Recruit 30–50 legitimate initial listings • Partner with local rental shops • Use community groups • Test referral incentives • Collect feedback • Track completed transactions. These are launch targets, not results.

HINGLISH MEIN

Shuru mein 30–50 real listings ka target rakho, local shops aur community groups se connect karo, feedback lo aur completed transactions track karo.

PRESENTER CUE · Make clear that 30–50 is a proposed target, not an achieved number.

Risks are real. Plan for them.

Mitigation should match the risk.

LOW SUPPLY

Seed reliable local listings

DAMAGE / NO RETURN

Terms + condition records

FAKE LISTINGS

Verification + moderation

DELIVERY COST

Show pickup/shipping separately

LEGAL / PRIVACY

Local review before launch

ENGLISH

Low inventory → seed supply locally. Trust/fakes → verification and moderation. Damage/non-return → condition records and clear terms. Delivery cost → transparent options. Disputes/privacy → support and minimal location exposure. Cross-border tax and consumer rules → country-by-country legal review. Insurance, payment holds and deposits need provider support and legal review.

HINGLISH MEIN

Har risk ka practical solution chahiye. Deposit, insurance aur payment hold ke liye provider support aur legal review zaroori hai.

PRESENTER CUE · Be candid: mitigations reduce exposure but need operational testing and legal advice.

Better utilisation, potential community value

Measure impact instead of assuming it.

UTILISATION

Use existing items more often

ACCESS

Lower-cost access for some needs

COMMUNITY

Potential income from idle items

ENGLISH

Sharing and renting may help existing products get used more often, reduce some unnecessary purchases and create income opportunities. Environmental outcomes depend on actual behaviour, transport and product lifespan.

HINGLISH MEIN

Agar existing cheezein zyada use hoti hain, toh kuch users ko nayi cheez khareedne ki zaroorat kam ho sakti hai. Impact ko measure karna hoga.

PRESENTER CUE · Avoid claiming guaranteed emissions or waste reductions; describe what could be measured.

A phased roadmap

Prove the basics before scaling

01 Prototype + interviews → 02 Neighbourhood pilot → 03 Payments + trust tools → 04 City expansion → 05 Supported global markets

METRICS: search→booking • completed transactions • repeat users • on-time returns • disputes • listing availability • satisfaction

ENGLISH

1. Prototype + user interviews → 2. Neighbourhood pilot → 3. Reliable payments + trust tools + business sellers → 4. City expansion → 5. International expansion where legally and operationally supported. Track conversion, successful transactions, repeat users, on-time returns, disputes, listing availability and satisfaction.

HINGLISH MEIN

Pehle prototype test karo, phir local pilot. Jab transactions aur trust tools kaam karein tab city aur baad mein supported countries mein expand karo.

PRESENTER CUE · Name the metrics that tell the team whether the marketplace is healthy.

Let’s make access easier than ownership.

Start local. Think global.

“Let’s make access easier than ownership.”

ENGLISH

LOOP turns idle belongings into useful resources. Find what you need nearby, rent it when you need it, buy it when you want to own it, or earn from what you already have. Start local. Think global.

HINGLISH MEIN

LOOP unused cheezon ko useful banata hai. Jo cheez chahiye, nearby dhoondo; zaroorat ho toh rent karo, rakhni ho toh buy karo, aur apni unused cheez se earning karo. Shuruaat local, vision global.

LET’S BUILD THE FIRST NEIGHBOURHOOD PILOT

START LOCAL • THINK GLOBAL

PRESENTER CUE · Close with the core promise, then invite mentors to help test the first neighbourhood pilot.
